

EGY LANDSCAPE

EST. 2007 · CAIRO · HURGHADA

COMPANY PROFILE

Landmarks that tell *a story.*

Landmarks, landscape and art work for hotels, developers and governments across Egypt.

ABOUT US

Who we are.

EGY Landscape was established in 2007 to become one of Egypt's premier landscape contracting companies. We design and build landmarks, gardens, plazas and art work for hotels, resorts, developers and government entities.

Our work includes the Sharm El-Sheikh landmarks created for COP27 under the supervision of the Armed Forces Engineering Authority and the Cabinet, and landscape and art projects for hotels and resorts in Cairo, New Alamein and the Red Sea.

OFFICES

WHAT WE DO

01

Landmarks

Monuments and sculptures for squares and entrances.

02

Landscape

Hardscape, softscape and landscape lighting, with our own nurseries.

03

Art Work

3D walls, sculpted panels and lobby art.

04

Pools & Water

Pools, lakes, fountains and water features.

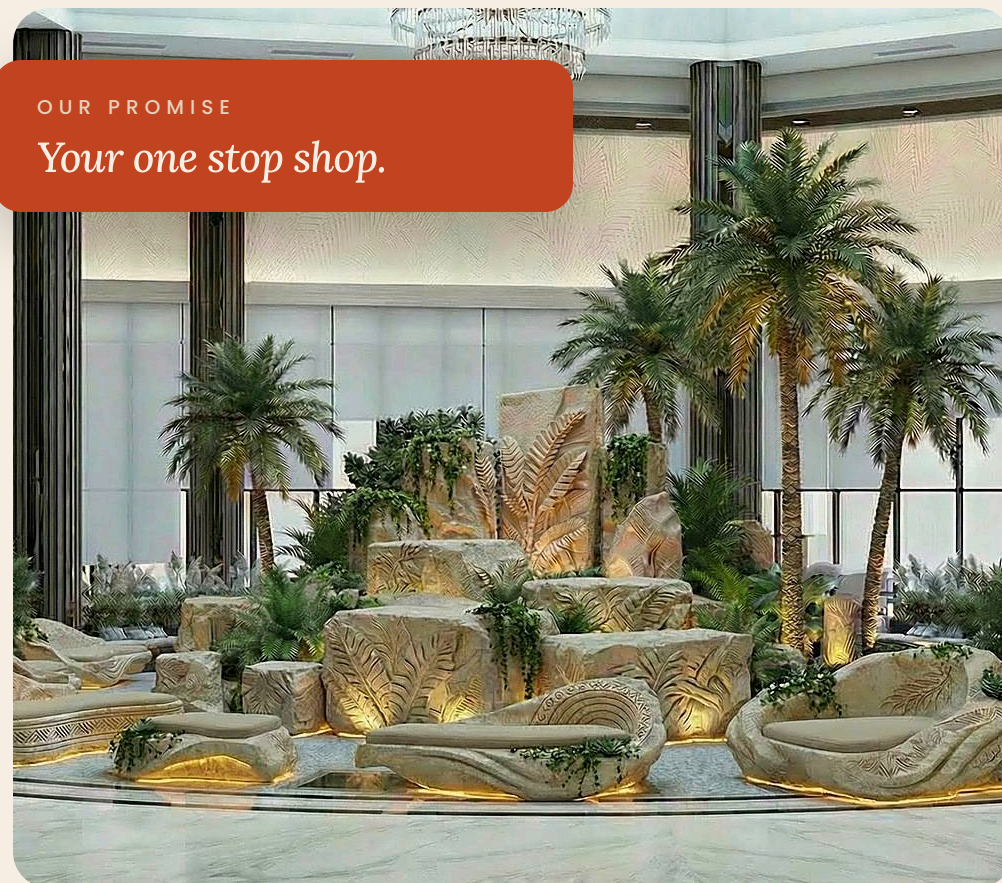

05

Outdoor

WPC decking, pergolas, furniture and solar lighting.

OUR PROMISE

Your one stop shop.

WHAT WE DO

One studio, *five crafts.*

From the first sketch to the last stone, we design and build. One team, one standard, one point of contact for every project.

Landmarks

Monumental sculptures and gateway features that give a place its identity.

Landscape

Softscape, hardscape and lighting, supported by our own nurseries.

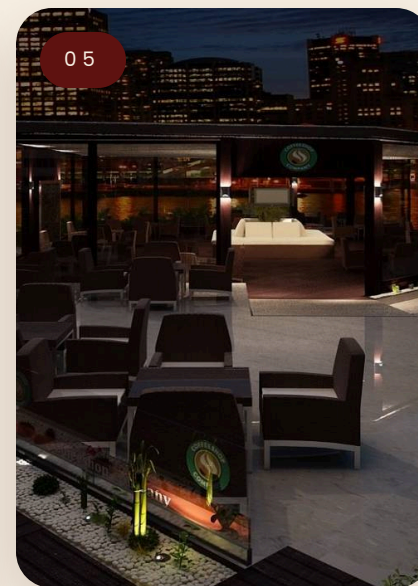

Pools & Water

Pools, waterfalls, rock work and water features that finish a space.

Art Work

Murals, 3D walls, mosaics and carved reliefs for interiors and facades.

Outdoor

Outdoor furniture and finishing for cafes, hotels and public spaces.

FEATURED PROJECT

COP27 Landmarks.

SHARM EL-SHEIKH · EGYPT

Two landmarks created for the city of Sharm El-Sheikh, ahead of the UN Climate Change Conference. Delivered through field work under the supervision of the Armed Forces Engineering Authority and the Cabinet, from concept to completion on site.

APPROVED DESIGN

Mazarine Landmark.

NEW ALAMEIN · NORTH COAST

A sculptural landmark for the main hall entrance, inspired by the movement of waves. Two crescent forms rise from a stone and water composition, with hidden lighting and natural planting.

3D DESIGN

Seen from *every angle.*

Two white marble crescents set within a circular water feature, in front of the main hall. By day the stone reads clean and bright; at sunset the concealed lighting turns the forms into a glowing landmark.

INTERIOR CONCEPT

MAZARINE · NEW ALAMEIN

The Hall, *reimagined.*

A large hall under a glass dome. Our field work brings a garden indoors — palms, carved stone and still water — and the design extends to the furniture, the reception and the relief walls.

PALMS

CARVED ROCK

WATER

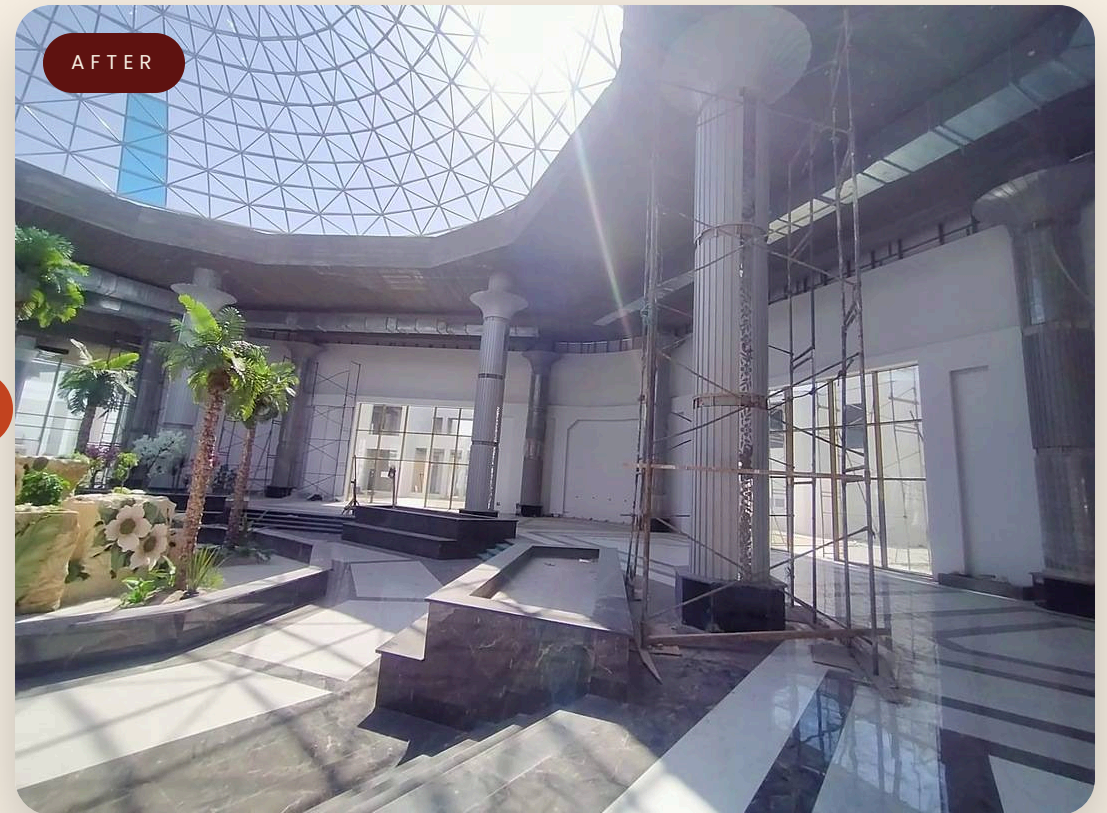

RELIEF WALLS

BACKGROUND: DESIGN VISUALIZATION

Field work, *before & after.*

Inside the hall we built the central garden from the ground up: palms, hand-carved rock planters and marble-clad basins, set into the stepped marble floor.

DESIGN PROPOSAL

HALL FURNISHINGS

Sculpted from stone.

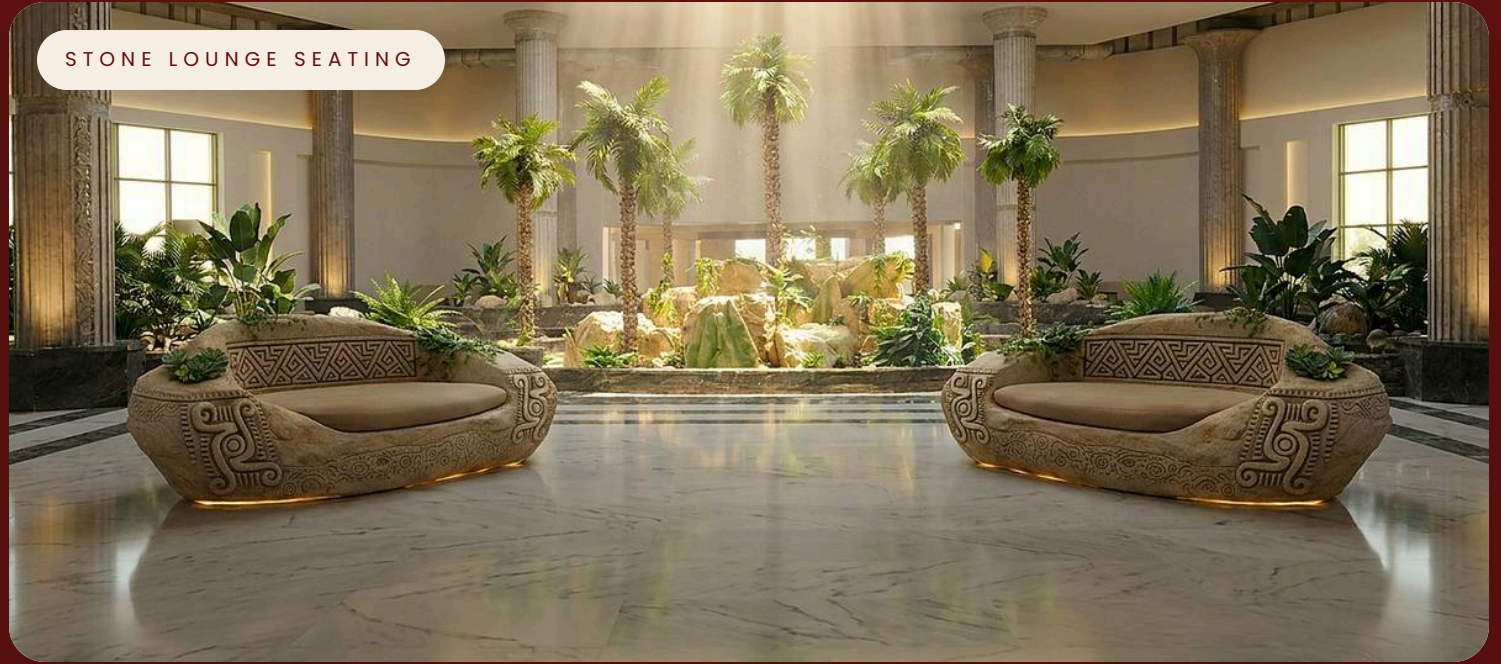

Lounge seating, the reception desk and the planters are shaped from natural stone, carved with leaf and heritage patterns and lit softly from below.

CARVED STONE

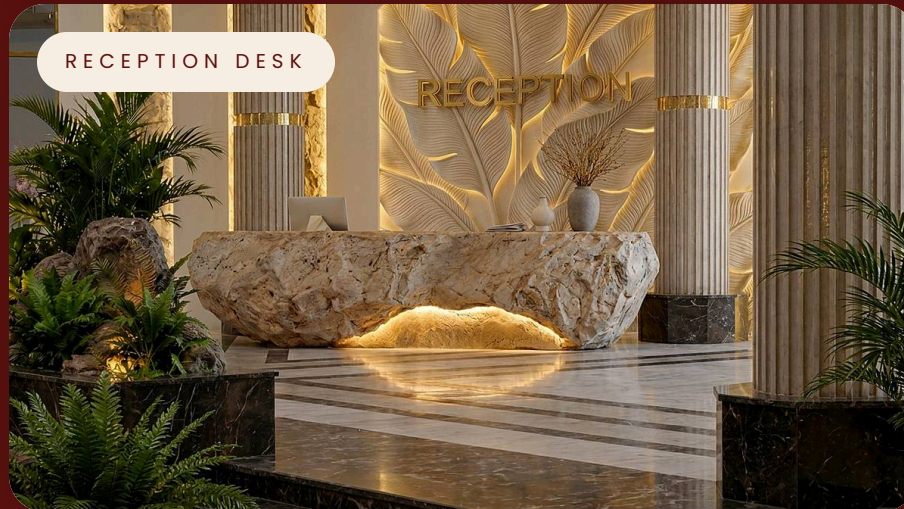

WARM HIDDEN LIGHT

STONE LOUNGE SEATING

RECEPTION DESK

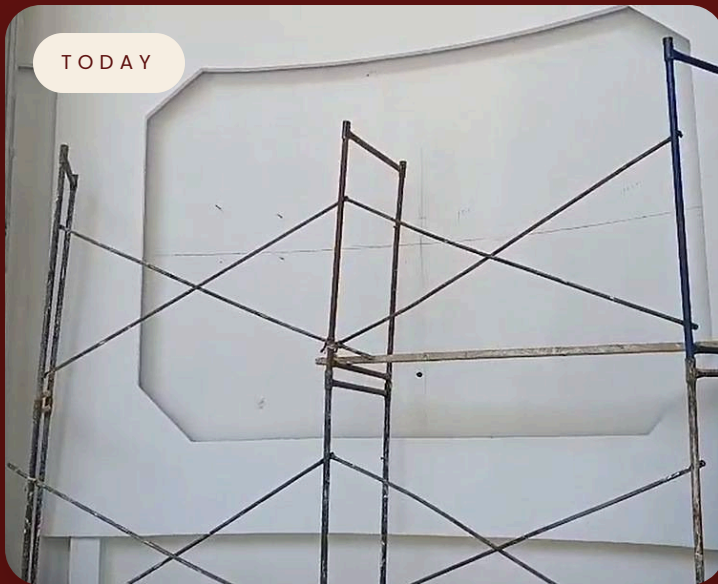

CARVED DETAIL

Relief wall options.

Two ideas for the large wall recess in the hall, both backlit and carved in stone. Each is shown in the same room, so the client can compare them directly.

The wall today

An octagonal recess, ready for a relief wall.

Leaf relief

Backlit stone leaves: calm, botanical and soft.

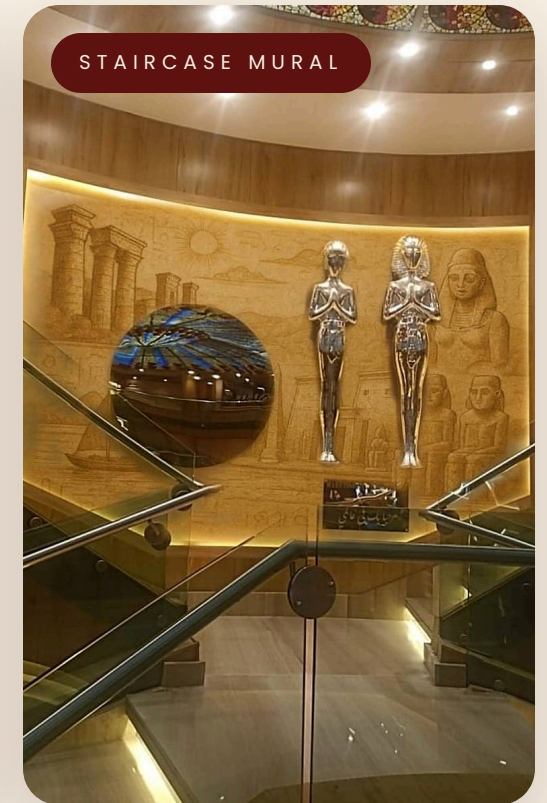

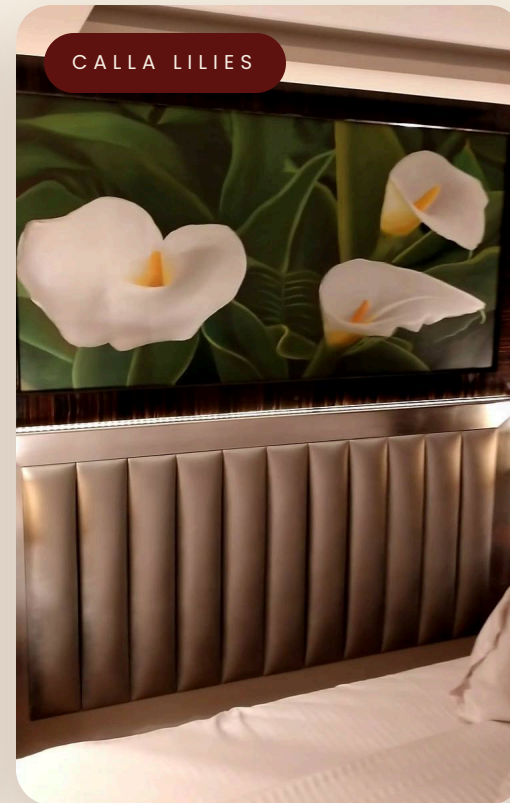

Heritage relief

A fortress, the new towers and the sea in one scene.

Tableaus for a 7-star cruise ship.

Large painted tableaus for the cabins, framed in dark wood with soft backlight, and a themed mural wall on the grand staircase. Each piece was made to sit inside the ship's interior design.

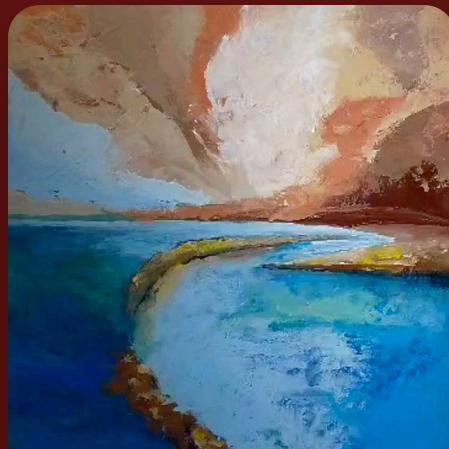

ART WORK · STUDIO

Made by hand, *in the studio.*

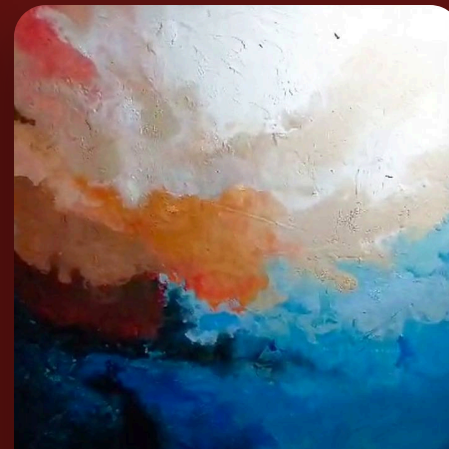

Rivers, coastlines and skies built layer by layer in thick, sculpted paint. A few of the canvases from our studio sessions, photographed on the easel.
